SUMMARY

Analytics and product professional with 4 years of experience translating client and customer data into business recommendations across marketplace and B2B SaaS engagements. Combines quantitative analysis, experimentation, and AI-driven solutions to diagnose business problems and deliver measurable impact on digital customer experience, funnel performance, and revenue. Comfortable owning client-facing discovery, synthesizing insights into deliverables, and guiding junior teammates through structured problem-solving.

PROFESSIONAL EXPERIENCE

- Assistant Product Manager, IndiaMART InterMESH Ltd. | Noida, India****Jan 2024 - Feb 2026**
- Defined enterprise data quality standards and launched an AI-ready agentic listing-approval workflow; achieved 95% precision and 90% recall at 300K daily inflow, eliminating manual ops and accelerating data-driven seller onboarding.
 - Designed and shipped an AI-powered data and catalog auditing system; corrected errors in 12% of listings, reducing buyer drop-off by 18% and driving measurable business value across discovery funnels.
 - Defined strategy and built an automated product to lead mapping system, eliminating 99% manual effort and saving 2000+ hours per month, delivering 250K annual savings with less than 6 month ROI.
 - Led search relevance overhaul using Qwen based retrieval, reducing latency from 2 seconds to 200 milliseconds and improving relevance by 35% across 5M plus monthly hits.
 - Built a model-evaluation pipeline (precision, recall, accuracy benchmarking) for an LLM-based auditing tool; reached 98% audit accuracy, doubled labeled data throughput, and reduced manual review effort from 400 to under 40 hours per week.
 - Drove LLM cost optimization strategy using prompt compression and token tuning, reducing cost to 0.0007 dollars per hit and enabling 100 times scale without performance trade offs.
- Business Analyst (Product Owner), Accenture Technology | Pune, India****Jun 2022 - Jan 2024**
- Led client-facing discovery for an enterprise security engagement; conducted 10+ stakeholder interviews, synthesized findings into a 12-month transformation roadmap, and presented recommendations that reduced post-launch rework by 40%.
 - Delivered 20 features across 26 agile sprints with <2% production defect rate, owning quality from requirements through UAT.
 - Analyzed customer usage data and competitive feature gaps; defined an integration strategy for 5 third-party tools that grew monthly active users 30% (4,000 to 5,200) and reduced churn.
 - Authored 10 plus PRDs and acceptance criteria for complex security features, eliminating requirement driven rework and reducing review cycles from 2 weeks to 4 days.
 - Translated enterprise client pain points into prioritized recommendations and MVP scope; drove 20% MRR growth and protected \$180K in at-risk renewals across 8-week delivery cycles.
- Market Research Intern, Path Infotech Ltd. | Noida, India****Apr 2021 - Jun 2021**
- Analyzed the Australian RPA industry to identify high growth opportunities and define data driven market entry strategies, prioritizing enterprise use cases for expansion.
 - Assessed Microsoft Power Automate market size and purchase drivers through quantitative analysis and user interviews, generating insights on pricing, feature demand, and competitive positioning for product and GTM teams.

EDUCATION

- Indian Institute Of Management – Amritsar - Master of Business Administration, General Management****Jul 2020 - Apr 2022**
- Gujarat Technological University (SCET) – Surat - Bachelor of Engineering, Information Technology****Jul 2016 - Apr 2020**

PROJECTS

- Management Consulting, CSRN****Nov 2021 - Jan 2022**
- Led a pro-bono management consulting engagement for an NGO; conducted stakeholder interviews, analyzed operational data, and built a digital transformation roadmap. Presented recommendations to senior leadership that expanded program reach by 1,000+ users and lowered delivery costs through operating model redesign.
- Affiliate Marketing, Electura**
- Led 200+ influencer partnerships to drive targeted campaigns, increasing brand reach, generating high-intent traffic, and boosting sales conversions through data-driven collaboration strategies.

SKILLS

Product Management & Delivery : Product Strategy, Roadmapping, PRD Authoring, MVP Definition, A/B Testing, User Stories, Backlog Prioritization, Agile (Scrum), Sprint Planning, UAT, Go-to-Market Strategy, User interviews, Customer Journey Mapping
Data & Analytics : SQL, Data Analysis, Funnel Analysis, Cohort Analysis, Power BI, Data strategy, Data governance, Excel(Adv)
AI / ML & Emerging Tech : LLM Applications, Prompt Engineering, Context Engineering, Agentic AI Systems, Generative AI (Gemini), AI Product Design, Model Evaluation (Precision/Recall), AI Cost Optimization
Tools & Platforms : JIRA, Confluence, Figma, Kibana, Google Analytics, REST APIs, Postman, Google Apps script
Business & Strategy : Stakeholder Management, Requirement Gathering, Business Analysis, Market Research, UX Optimization, Experimentation Frameworks, Data-Driven Decision Making, Competitive Analysis, Hypothesis-driven Analysis

ACHIEVEMENTS

- Pillar Of Success Award, IndiaMART**
Top Product Management Fellow, NextLeap

CERTIFICATIONS

- Digital Product Management, University Of Virginia**
Software Development Lifecycle Specialization, University Of Minnesota
Entry Certificate In Business Analysis (ECBA), IIBA
